

Listing of Claims:

1. (Previously amended) A system comprising:

a video display coupled with a receiving system, the video display to display a video broadcast; and

a computing device coupled with the receiving system, the computing device having a second display to concurrently display an Electronic Programming Guide (EPG) corresponding to the video broadcast and received from said receiving system and the video broadcast, the computing device configured to enable a user to concurrently display any portion of the EPG on the video display.

2. (Canceled)

3. (Previously amended) The system of claim 1, wherein the computing device is interconnected to a network and receives the EPG via the network connection.

4. (Previously amended) The system of claim 1, wherein the computing device is a wireless device.

5. (Previously amended) The system of claim 12, wherein the computing device is a Personal Digital Assistant (PDA).

6. (Previously amended) The system of claim 1, wherein the computing device is a Web Phone.

7. (Original) The system of claim 1, wherein the video display coupled with the receiving system is a television system.

8. (Original) The system of Claim 1, wherein the video display coupled with the receiving system is a set top box.

9. (Previously amended) A method comprising:

a first video display coupled with a receiving system, the video display displaying a video broadcast;

a computing device coupled with the receiving system, the computing device having a second display for concurrently displaying an Electronic Programming Guide (EPG) corresponding to the video broadcast, the computing device receiving said EPG from said receiving system and the video broadcast; and
the computing device enabling a user to concurrently display any portion of the EPG on the video display.

10. (Canceled)

11. (Previously amended) The method of claim 9, further including the computing device receiving the EPG via the network connection.

12. (Previously amended) The method of claim 9, wherein the computing device is a wireless device.

13. (Previously amended) The method of claim 9, wherein the computing device is a Personal Digital Assistant (PDA).

14. (Previously amended) The method of claim 9, wherein the computing device is a Web Phone.

15. (Original) The method of claim 9, wherein the first video display coupled with the receiving system is a television system.

16. (Original) The method of claim 9, wherein the first video display coupled with the receiving system is a set top box.

17. (Previously amended) A machine readable medium having stored thereon a set of instructions, which when executed cause a system to perform a method comprising:

 a first video display coupled with a receiving system, the video display displaying a video broadcast;

 a computing device coupled with the receiving system, the computing device having a second display concurrently displaying an Electronic Programming Guide (EPG) corresponding to the video broadcast and received from said receiving system and the video broadcast; and

 the computing device enabling a user to concurrently display any portion of the EPG on the video display.

18. (Canceled)

19. (Previously amended) The machine readable medium of claim 17, wherein the method further includes the computing device receiving the EPG via the network connection.

20. (Previously amended) The machine readable medium of claim 17, wherein the computing device is a wireless device.

21. (Currently amended) The machine readable medium of claim 17, wherein the computing device is a Personal Digital Assistant (PDA).

22. (Previously amended) The machine readable medium of claim 17, wherein the computing device is a Web Phone.

23. (Original) The machine readable medium of claim 17, wherein the first video display coupled with the receiving system is a television system.

24. (Original) The machine readable medium of claim 17, wherein the first video display coupled with the receiving system is a set top box.
